

# FREE SWEETHEART FREE TOILET SOAP

To the People of Bryan and Vicinity  
Saturday, April 3rd

## THE DAILY EAGLE

On above date will publish as a compliment to every patron of the paper, a FREE COUPON good for a full size cake of the Famous Sweetheart Soap. Just cut out the Coupon and present it to any dealer handling Sweetheart and he will gladly give you the Free cake

### A HARD WATER TOILET SOAP

## Sweetheart Soap

Is made from the purest and best materials, contains Benzoin for the skin, cold cream and glycerine to whiten and soften it. Its odor is like the fragrance of fresh cut roses, lathers freely in hard or soft water, and for bath, toilet and nursery has no superior. But why use this valuable soap when by the short cut of actual test and personal experience we can put you in a position to know for yourself, all at our expense, the reason of its immense popularity; why more of it is being used by the American people than any Toilet Soap now on the American market; why the wholesaler buys it by the carload, and the immense demand for it has made us the largest exclusive Toilet Soap manufacturers in the world. We want Sweetheart Soap a household word in every Texas home, and hence our most liberal coupon offer in The Daily Eagle for next Saturday.

### To the Retail Trade

We will redeem your Coupons for five cents in cash. Thus you make your full profit on every Free cake just as though it were a cash sale. Order from your Jobber's Salesman at once, and share in the largest distribution of Toilet Soap ever made in this territory.

BRYAN, TEXAS MARCH 31, 1909.

Notwithstanding the almost unprecedented backwardness of the spring Bryan people are enjoying onions and radishes from their own gardens.

Stealing ideas is morally as culpable as stealing money. Roosevelt stole Bryan's policies and audaciously claimed them as his own and Des Moines is trying to sneak from Galveston the honor of inventing the commission form of municipal government.

It is alleged that a San Antonio man was caught hugging a beautiful wax dummy in a show window. Have the militant suffragettes of the Alamo city stricken the men with such terror that they dare not bestow their caresses on the palpitating forms of symmetrical femininity so abundant there?

### Quick Meal

A stove that is always ready!  
A stove that makes no smoke, smell or ashes!  
A safe stove! An economical stove! A clean stove!  
A stove that requires no skill to operate it!  
A stove which has revolutionized "cooking," and has transformed the drudgery of the kitchen work into a pleasant pastime.  
A "Quick Meal" Stove will do any and all work that can be done on a wood or coal stove, only with the difference that the "Quick Meal" does it quicker, cheaper and in a more agreeable and reliable way.

Cole Hardware Co.

Almost as soon as Judge Storey exhaled his last breath last Sunday morning, politicians began to discuss the appointment of his successor as a member of the railroad commission. Among the names most frequently mentioned in this connection are those of Representative Mobley of Henderson county, who was the administration candidate for speaker of the house; Editor McCollum of the Waco Tribune, recently appointed a director of the A. and M. College; and Hon. Trav Dashiell, now commissioner of taxation. All of these are thick and thin friends of the governor and it is highly probable that he will name one of them for the vacant place. In case Dashiell secures the plum it is probable that Mobley will get his place as tax commissioner. We Brazos county people thought a heap of Trav Dashiell when he was our district attorney and have a sneaking liking for him yet, and since nobody but a Campbell man has a show we should like to see Trav draw the white bean.

### A. AND M. DIRECTORS MEETING. Contract Awarded to J. S. Harrison of Waco For New Experiment Building.

Col. R. T. Milner has returned from Dallas where he attended an important meeting of the board of directors of the A. and M. College. The board met in the Oriental hotel and awarded to J. S. Harrison of Waco the contract for erecting the experiment building at the college. Mr. Harrison's bid was \$33,963. Other bidders were the M. S. Hasle Construction Company of Dallas; the Brooks-Gordon Construction of Houston; L. R. Wright of Dallas, E. J. Zimmerman of Cleburne and J. O. Polhemus of Austin.

The board spent some time in discussing some proposed additional departments to the college. Since the teaching of agriculture in the public schools has been made compulsory, it was thought that there should be in the Agricultural and Mechanical College a department of agricultural pedagogy, for the purpose of training in this science teachers for service in the public schools. A department of rural engineering, for teaching irrigation, road construction and farm mechanics was also considered desirable. The board likewise favored a correspondence course of instruction in agriculture, horticulture, dairying and animal husbandry. Col. R. T. Milner, president of the college, and Walton Peteet were constituted a special committee to lay these matters before Governor Campbell and the legislature.

The following members of the board were in attendance: Judge K. K. Leggett of Abilene, president of the board; Judge T. D. Rowell of Jefferson, vice president; Judge A. Haidussek of La Grange, Hon. E. R. Crone, state commissioner of agriculture; Walton Peteet of Fort Worth. The absentees were: Judge John M. Green of Yoakum, Hon. W. P. Sebastian of Breckenridge and Col. A. R. McCollum of Waco.

President R. T. Milner of the Agricultural and Mechanical College, Dr. H. H. Harrington, director of the experiment station, and Prof. F. E. Giesecke, instructor in agricultural engineering, attended the meeting.

### FOR WOMEN AND THE HOME.

A sun-bath is of more value to health than much warming by the fire.

To cure a sting of bee or wasp, mix common earth with water and apply at once.

Bent whalebones, the genuine article, are straightened by soaking them in boiling water a few minutes and then ironing them straight.

Neuralgia may very often be speedily relieved by applying a cloth saturated with essence of peppermint to the seat of pain and leaving it there.

Soft soap, made from half a pound of hard soap and two quarts of boiling water, is more economical for laundry purposes than ordinary washing soap.

A good deodorizer is made by applying a hot poker to a lump of camphor gum in a saucer. The strong fumes will clear the atmosphere of a room in a few moments.

One teaspoonful of ammonia in a cupful of water will clean gold or silver jewelry. A few drops on the under side of a diamond will clean it immediately, making it very brilliant.

Delicate colors can be set by soaking in a cupful of common salt to every two quarts of water. A tablespoonful of turpentine in a pailful of lukewarm water will set colors as well.

Leather belts or boots that have been soaked in water or dried hard may be softened by rubbing them plentifully with coal oil. If the leather is very dirty wash it with hot soap suds first.

To renovate velvet, free it from dust by laying it face down and whipping it smartly; then brush it with a soft hair brush; dampen on the wrong side with borax water, and hang, pile inward in the sun to dry.

To prevent buff and gray lines from fading or growing streaky in the process of laundering add a tablespoonful of black pepper to the first water in which they are washed and then launder in the usual way.

Great care should be taken to dry towels thoroughly before putting them away. If placed in the linen presses without being thoroughly aired, while still damp, a mold is likely to form upon them, which, it is said, produces skin diseases.

An insect in the ear may be destroyed by pouring a teaspoonful of warm olive oil or camphorated oil into the ear and keeping it there for some time, holding the head in a position to retain the oil, which will afterward come away with the dead insect.

A good scheme for freshening the appearance of white silk parasols, or any silk that will stand water, is to wet them thoroughly all over, open them and let them remain so until dry. All wrinkles are done away with, and instead of a muss, half-worn looking article one has an apparently new parasol.

The straw hat of last season may be cleaned by scrubbing it with a brush and pure castile soap and water. If it looks yellow after this scrubbing, rub it with lemon juice to bleach it. Then press the brim straight with a hot iron. A new hat band will complete the rejuvenation, until the hat looks like new.
